-- The MAILING DATE of this communication app ars on the cover sheet with the correspondenc address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 February 2001.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 31-54 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 31-54 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claims _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are objected to by the Examiner.
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

Attachment(s)

- 15) ☒ Notice of References Cited (PTO-892)
- 16) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 17) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____
- 18) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 19) ☐ Notice of Informal Patent Application (PTO-152)
- 20) ☐ Other: _____

Art Unit: 2822

DETAILED ACTION

1. This Office Action is in response to the Amendment filed February 12, 2001.

Claims 1-30 are canceled.

Claims 31-54 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 31-54 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "as thin as possible" in claim 31 is a relative term which renders the claim indefinite. The term "as thin as possible" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. The claims do not define what thickness is possible or impossible to obtain.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 31-35, 37-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Efland et al. (U.S. 6,025,275) in view of Byrne (U.S. 5,136,364).

Regarding claims 31-54, Efland et al. discloses forming a dielectric layer 22 over a metal layer on a substrate, the metal layer including a bond pad and a metal member space apart from the bond pad by a gap (fig. 1A), the dielectric layer 22 may be composed of several layers of dielectric having different makeup, the dielectric layer 22 may be composed by several layers (oxide, nitride, or polyimides) (col. 3, lines 40-45, col. 5, lines 25-30).

Efland et al. also discloses forming an opening (fig. 1A). Efland et al. teaches forming a conducting barrier layer 30 over the dielectric layer, over sidewalls of the opening, and over the exposed top surface of the bond pad (fig. 1B, the formation of a continuous seal is inhered). Furthermore, Efland et al. shows an electroplating process to form a copper lead 50 (fig. 1C, col. 5, lines 30-40).

Efland et al. does not specifically show the formation of first, second, and third material. However, Efland et al. teaches the dielectric layer 22 may be composed by several layers (oxide, nitride, or polyimides) (col. 3, lines 40-45, col. 5, lines 25-30). In addition, Byrne '364 shows the formation of the material to prevent moisture penetration (col. 2, lines 45-65).

Efland et al. fails to show forming the fourth material comprising an upper 4,000 Angstroms thick nickel vanadium film. However, this is known in the art as evidenced Byrne '364.

Byrne '364 discloses forming: a substrate 10, a bonding pad 11, a two component passivation layer, a first dielectric layer (silicon dioxide), a second dielectric layer (silicon nitride), a third dielectric layer can be a polyimide layer (fig. 3-5, col. 2,

Art Unit: 2822

lines 60-65, col. 3, lines 1-35). Byrne '364 also teaches forming an opening to exposed the top surface of the bonding pad, depositing a barrier layer (fig. 3). Byrne '364 discloses typically bumps are connected to the bonds pads. Byrne '364 also discloses a barrier layer comprising a nickel-vanadium layer (col. 2, lines 40-43). Furthermore, Byrne '364 discloses the formation of the bump as well known in the art (col. 1, lines 10-25).

Therefore, It would have be obvious to a person of ordinary skill in the art to modify Efland et al.'s process by including the information provided by Byrne. The modification would provide an a seal for a semiconductor device which will exclude contaminants from the critical parts (Byrne, col. 1, lines 48-51).

4. Claim 36 is rejected under 35 U.S.C. 103(a) as being unpatentable over Efland et al. (U.S. 6,025,275) and Byrne (U.S. 5,136,364 as applied to claims 31-35, 37-54 above, and further in view of Lou (U.S. 5,759,906).

Regarding claim 36, Efland et al. fails to show the first material being doped with fluorine atoms. However, Lou teaches the use of fluorine-doped silicon oxide as well known as low dielectric material to reduce the capacitance between lines (col. 1, lines 60-67, col. 2, lines 5-10).

Therefore, it would have be obvious to a person of ordinary skill in the art to modify Efland et al.'s process by including the layer comprising fluorine atoms as taught Lou. The modification would provide an interconnection having reduce capacitance between lines.

Art Unit: 2822

Response to Arguments

5. Applicant's arguments with respect to claims 31-54 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bertolet et al. discloses the formation of a bump such as a gold bump, aluminum bump, or (C4) type solder ball as known in the art.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maria Guerrero whose telephone number is 703-305-0162. The examiner can normally be reached on M-F (8:30-5:00).

Art Unit: 2822

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Whitehead Jr. can be reached on 703-308-4940. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7722 for regular communications and 703-308-7382 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
